

I am from Indiana and have used the Telephone Privacy Law of my State to avoid the unwanted calls from people trying to sell me something I don't want. It has been so nice to sit down to a meal, read a book, or have a conversation with my wife without being interrupted and having to tell the caller I don't want their service or product. Even if I have dealt with them before. If I want a service or item from them I will call them not them calling me. I don't have Cable or satellite T.V. So I get all the ads I want or need from T.V. Radio, News paper, Billboards, Buses Etc. My parents are 89 years old and would be easy targets for a fast talking scoundrel wanting their credit card number or their bank account. They are also on the phone protection list. If you want to make a law that protects the nation please don't make one that weakens our state law. It should strengthen our state laws. Thank you.
